

*Open Access Journals, Subvention  
Funding, OA Policy, and Public Access  
Compliance*

Health Professions Educator Series  
July 24, 2023

Presenters: [Rachel Miles](#),  
Research Impact Coordinator  
& [Kiri DeBose](#),  
Director, Health Sciences  
Libraries

# Today's Outline

- Overview of Open Access (OA)
- OA Journal Selection
- Virginia Tech OA Subvention Fund
- Virginia Tech Intellectual Property & OA Policy
- Depositing / Sharing Works OA on VTechWorks
- Public Access & Open Access

# Overview of Open Access

# What is Open Access?

As defined by [Springer](#):

At its most fundamental Open Access is when publications are ***freely available online to all at no cost and with limited restrictions with regards reuse***. The unrestricted distribution of research is especially important for **authors** (as their work gets seen by more people), **readers** (as they can access and build on the most recent work in the field) and **funders** (as the work they fund has broader impact by being able to reach a wider audience).

As defined by the [University Libraries at Virginia Tech](#):

Open Access refers to the removal of price and permissions barriers to peer-reviewed research.

Open access can be achieved by:

- Publishing in an open access journal, or
- Depositing an article version such as an accepted manuscript or preprint into a repository

# Value & Benefits of Open Access

# Challenges of Open Access

“Predatory” publishers

Stigmas

- Pay-to-publish
- Vanity presses

Article Processing Charges (APCs) can be **very** high per article

# Selecting OA Journals for Publication

- Scope / Purpose / Audience
- Rigor / Reputation
- Findability / Discoverability
  - ([Ulrichs](#) states where indexed)
- Impact in the field (IF)

# Selecting OA Journals for Publication

Be sure to:

[Checklist available!](#)

[Books & Chapters](#)

[Journals](#)

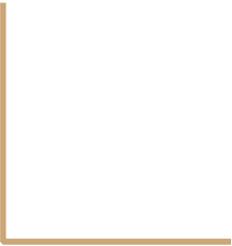

(does require some time to dig  
and find the information!)

# Open Access in General:

# University Libraries Open Access Subvention Funding

# As you go through the journal selection process:

Consider what funding (if any) you have available for OA Article Processing Charges (APCs) **before** you select a journal to submit.

1. Grant funds
  - a. “easy” to add to budget request
  - b. May not be option for smaller grants
    - i. e.g. some stipulate what funds can be used for
2. Department / college
  - a. Funds can be used to pay APCs (some depts allocate certain amount)
3. Open Access Subvention fund (from library)
  - a. Last resort; max. \$1500 APC, no cost sharing
  - b. [Some discounts available](#)

# VT Open Access Subvention Fund

- Funds are available to underwrite article processing charges (APCs) for scholarly peer-reviewed articles accepted for publication in open access journals.
- All current Virginia Tech faculty, staff, and students; VTCSOM students; and VTCSOM faculty who are employed by Carilion Clinic are eligible.
- OASF support is not available if a grant supported the research upon which the article is based. (Some exceptions apply, e.g., the grant does not support publication of research results.)
- OASF support is not available if your department, school, college, or institute has funding to support OA publishing. The request form requires that you have checked with your affiliated units before applying to the fund.

*Questions about the fund can be sent to [oasf-g@vt.edu](mailto:oasf-g@vt.edu)*

# VT OASF Guidelines

- Hybrid journals are not supported
  - You can decline the OA option, and provide free, no-embargo access to your accepted version by using Virginia Tech's [Open Access Policy](#).
- Fully OA journals:
  - The OA journal's publisher must be a member of the [Committee on Publishing Ethics](#) (COPE) or the [Open Access Scholarly Publishers Association](#) (OASPA) or comply with a similar [Code of Conduct](#)
  - OA journals should be registered in an open access directory such as the [Directory of Open Access Journals](#) or [Sherpa/Romeo](#).
- The funding limit is **\$1500 per article**. Please note that this is now a hard cap, and **all invoices have to be paid in full by the OASF if supported** (i.e., no cost sharing allowed)

# Rationale for changes to the funding Article Processing Charges (APCs)

<b>Traditional Subscription Business Model</b>		
\$3,225/year per library (moderately priced subscription journal)	250 libraries subscribed	\$806,250 annual journal revenue
<b>Open Access Business Model</b>		
\$3,225 APC	2,113 articles / year	\$6.8 million annual journal revenues

Estimates based on journal subscription fees and APCs for *Frontiers* journals

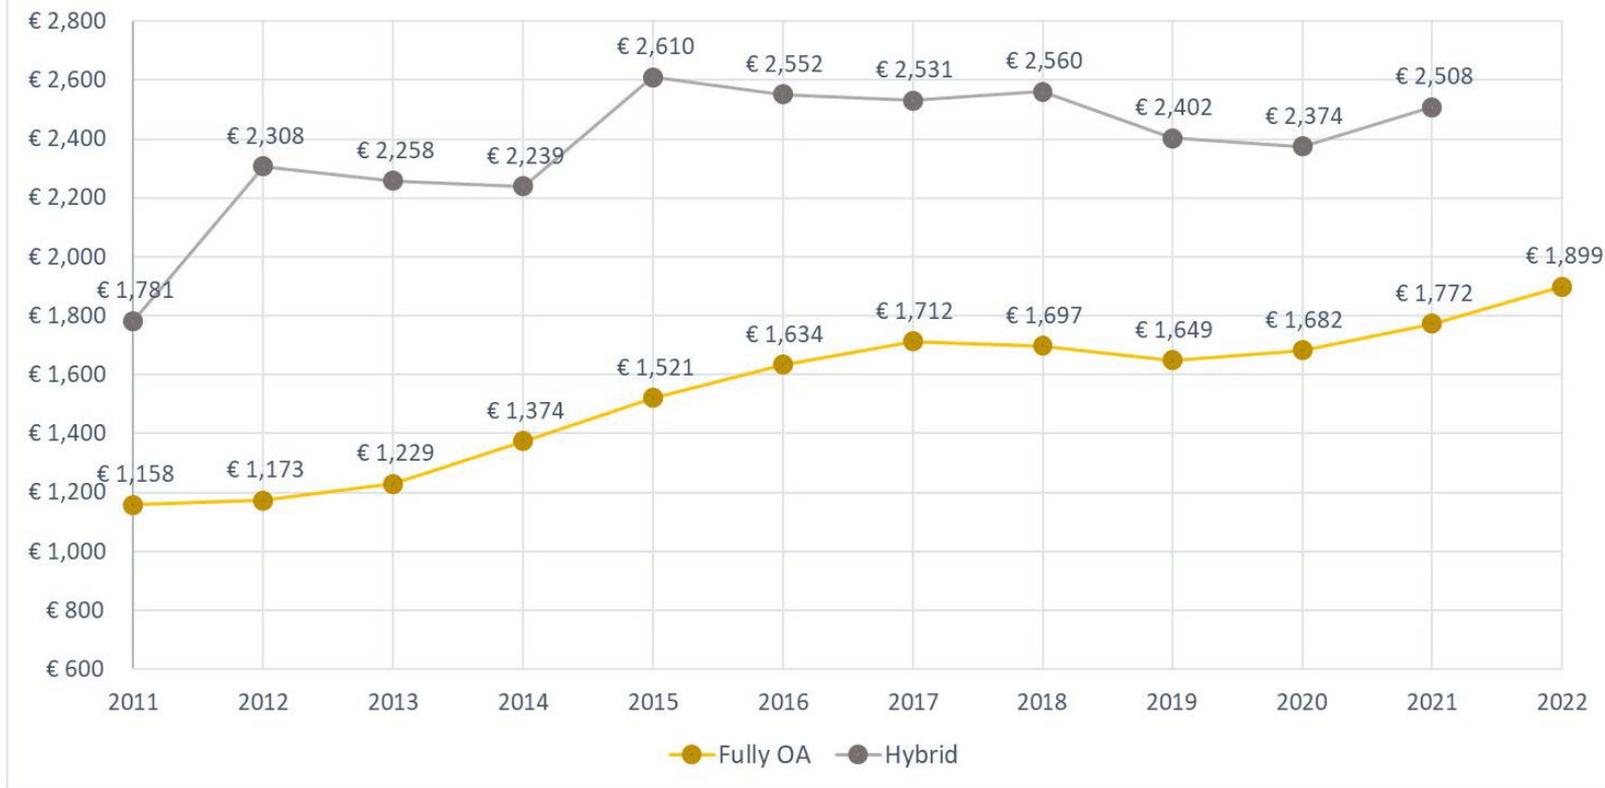

# Average and Median Article Processing Charges, 2004-2022

N = 152,746

Average APC in fully OA journals; data comes from the [Open APC Initiative](#). Prices are displayed in Euros.

## Average Article Processing Charge: Fully OA Journals vs. Hybrid Journals, 2011-2022

Average APC in Hybrid vs. OA Journals

Data from [Open APC Initiative](#)

# VT OASF Guidelines

- **Approved requests must be at or below \$1500.**
  - The fund will no longer support APCs higher than \$1500 regardless of whether there is additional funding available; in other words, cost-sharing arrangements are no longer permitted if you receive funding from the OASF.
- **Authors are limited to \$3000 in funding per fiscal year (July-June).**
  - For papers with multiple Virginia Tech co-authors, the OASF still subsidizes the same total amount of up to \$1500 per article but the support is prorated among each of the VT authors. For example, an article request for \$1500 with 3 Virginia Tech co-authors would be prorated at \$500 each.

# Further rationale / explanation for reducing support for OASF

*The University Libraries, with support from the Provost's Office, is implementing stricter criteria for the OASF, reducing award amounts, and overall funding in order to reduce support for the commercial-side of OA infrastructure.*

---

# Further rationale / explanation for reducing support for OASF

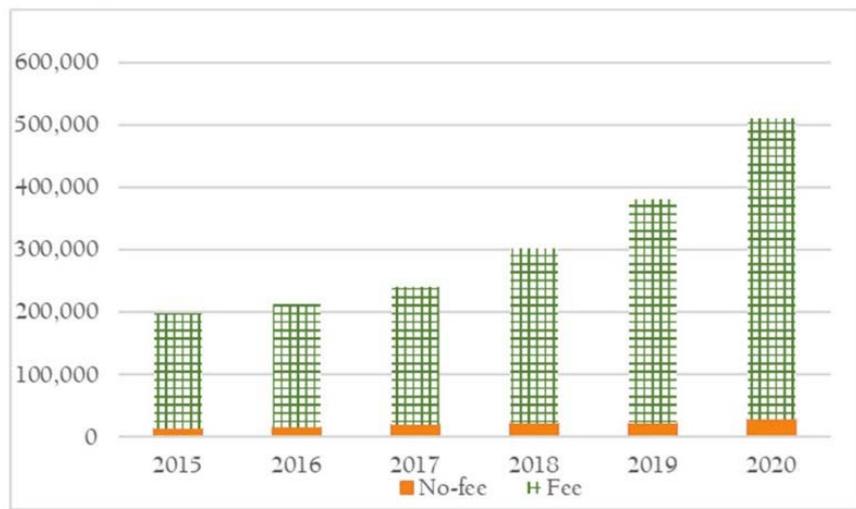

There are other means to make work openly available, such as taking advantage of Virginia Tech's Open Access Policy, which went into effect July 1, 2021.  
*Next section will cover this)*

---

# Articles with APCs vs No APCs

While nearly 69% of active OA journals are no-fee, most articles (65%) are in fee-charging journals

Fee and No-Fee Articles by Year, Big 9

Fee and No-Fee Articles by Year, The Rest

Source: <https://waltcrawford.name/goa6.pdf> (OA self-published book by a library scholar)

# OA Journal Selection Tips

- Beware of ‘paper mill’ journals
- Many of the large for-profit publishers have rapidly increased the number of journals and articles they publish (e.g., Frontiers, MDPI)
  - These two journals are still [COPE members](#) and [OASPA members](#), but often scholars question their rapid publishing and peer review practices.
- To find OA journals without APCs, go to the [DOAJ](#), search for a journal in your subject domain, and select the ‘Without fees’ filter
- Unfortunately, you cannot sort or filter by the APC amount, but you can browse and find the information

191 indexed journals

⚙️ Refine search results

# Intellectual Property & Open Access Policy

# Property

## *(Section 2.3.A.8)*

A **no-cost, embargo-free open access for accepted versions of scholarly articles is available to all VT researchers thanks to Virginia Tech's Open Access Policy**, approved by the Board of Visitors on March 22, 2021. Accepted versions are available in [VTechWorks](#), which receives over 3,000 downloads per day from around the world.

8. For Scholarly Articles: Authors grant to the university a nonexclusive license to their scholarly articles in order to provide open access (free, public, online access) to them via the university repository. However, anything deposited in the university repository is subject to the provisions of all the numbered paragraphs above. An author may waive the license for a particular article or delay access for a specified period of time. The university may not sell the articles. Authors deposit in the university repository an electronic copy of their unformatted, post peer-review, accepted manuscript for each scholarly article within one month after the date of its publication. Upon deposit of accepted manuscripts into the university repository, the university grants authors a nonexclusive license to share accepted manuscripts elsewhere.

# What does the policy allow you to do?

- **Legally** deposit your **Author Accepted Manuscript (AAM)** of your published articles (journal articles & book chapters)
  - Must be published after July 1, 2021
  - Deposit it immediately after acceptance to one month after publication
  - You **do not** need to honor the publisher copyright policy or contract with respect to deposit of the AAM (e.g., no need to honor the embargo periods)
  - Permanently link to and save your important scholarly work
    - Link to it on other profiles (e.g., LinkedIn)

## Open Access Policy at Virginia Tech: Home

Information to help Virginia Tech authors deposit scholarly articles to VTechWorks

- Home
- Version Prep
- How to Deposit
- FAQ
- Waiver
- About VTechWorks
- History

### In Brief

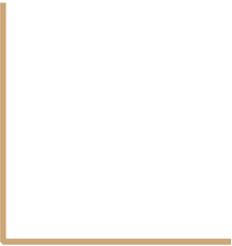

Virginia Tech's open access policy enables authors to legally provide open access to the accepted version (**not** the journal's published version) of their scholarly article, *regardless of what your copyright transfer agreement says* (a very small number of publishers may require you to waive the policy). The policy follows U.S. copyright law and has been vetted by Virginia Tech's Office of Legal Counsel. More than 100 U.S. universities already have a similar policy in place.

Details on how to deposit your articles for open access:

- **Who** : All faculty, staff and students (anyone with a VT affiliation)
- **What** : The accepted version of your scholarly article (or the published version if openly licensed or in the public domain)
- **When** : The day of acceptance through one month after publication, no embargo needed
- **Where** : VTechWorks (learn more in the [About VTechWorks](#) tab)
- **How**: There are three deposit options (for details, see the [How to Deposit](#) tab above):
  - Elements (EFARs), *\*faculty and grad students only\**
  - [OA Policy Deposit Form](#)
  - Email [vtechworks@vt.edu](mailto:vtechworks@vt.edu)
- **Why**: Most scholarly articles written by VT authors are not available to the public, which includes scholars in low and middle-income

**VTechWorks:  
Depositing / Sharing Works OA**

# What is VTechWorks?

**VTechWorks** provides global access to Virginia Tech scholarship, including:

- Theses and dissertations
- Journal articles
- Books & book chapters
- Technical papers
- Reports
- Presentation slides
- Conference papers
- Administrative documents
- Videos
- Images
- + more by faculty, students, and staff

**Benefits of VTechWorks:**

- 94,000 items and growing
- 3,000+ downloads per day, on average
- Highest usage from the U.S., India, China, the Philippines, the U.K., and Canada; downloads come from almost every country in the world
- Indexed by all search engines, as well as Google Scholar, Unpaywall, BASE, and the university homepage search ([vt.edu](http://vt.edu))
- A permanent URL (handle) for each item
- Download statistics for each item
- Preservation for each item and metadata updates
- Maintained by VT Libraries - contact us anytime, [vtechworks@vt.edu](mailto:vtechworks@vt.edu)
- Read more about VTechWorks in this [VT News article](#)

# Prepare your Manuscript for Deposit

Create a **cover page or header** on the first page of your AAM that includes:

- Author information and affiliation(s)
- Link / DOI to the publisher's version
- Information / citation about the published version (journal or book title, issue & volume number, etc.)
- Check for accessibility
- Convert to PDF

[Example of a cover page](#)

[Example of a header](#)

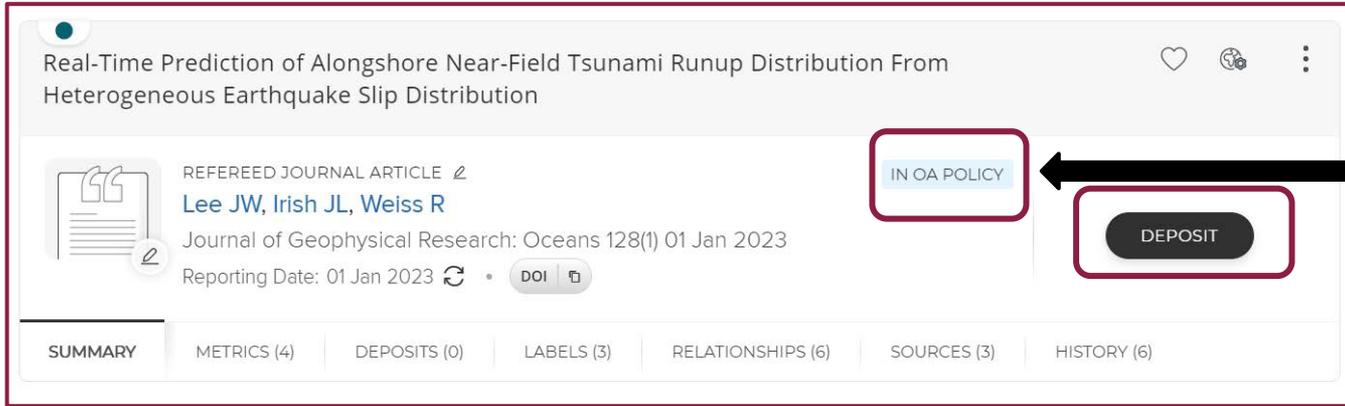

More information & tips: <https://guides.lib.vt.edu/oapolicy/prep>

# Three ways to deposit to VTechWorks

- Directly on VTechWorks
- Web deposit form
- Deposit via Elements
  - If you're an Elements user, this is the easiest way

# Depositing manuscripts via Elements

1. Login to [Elements](#)
2. Go to Scholarly & Creative Works
3. Find or add the item for which you want to deposit the AAM
4. Select 'Deposit' (black button)

The screenshot shows the Elements interface for a journal article. The article title is "Real-Time Prediction of Alongshore Near-Field Tsunami Runup Distribution From Heterogeneous Earthquake Slip Distribution". The authors are Lee JW, Irish JL, and Weiss R. The article is from the Journal of Geophysical Research: Oceans, volume 128(1), published on 01 Jan 2023. The reporting date is also 01 Jan 2023. There are icons for DOI and a trash can. The article is marked as "IN OA POLICY" and has a "DEPOSIT" button. The page has tabs for SUMMARY, METRICS (4), DEPOSITS (0), LABELS (3), RELATIONSHIPS (6), SOURCES (3), and HISTORY (6).

You'll know it's covered by the OA policy if you see the "IN OA POLICY" label on the work in Elements

# Depositing manuscripts in Elements (continued)

5. In the pop-up box, click "Deposit" again.
6. On the deposit screen, click "Browse" to select a PDF from your computer, and for File version, choose "Accepted version" (or "Published version" if the article is published open access with a CC license). Then click "Use this file."

## Not covered by the policy?

- If it's a book chapter published after July 1, 2021, it *is* covered by the policy but Elements doesn't label it
- If it's published *before* July 1, 2021, most of the time, you can still archive the AAM as long as you honor the publisher's embargo (see next slide)

## 1. Prepare deposit (step 1 of 3)

### Upload a file

Choose a file from your local machine:

Choose file:  MyArticle.pdf

File version:  ▾

Use this file

# Retroactively Deposit Accepted Manuscripts of Published Scholarly Articles

- Most publishers allow *some* version of the manuscript to be deposited in a repository (often the Author's Accepted Manuscript (AAM)), but often on the condition of an **embargo period**.
- For scholarly articles **published before July 1, 2021**, you can check the publisher copyright contract or policy.
- Your copyright contract is the best place to look
- The SHERPA/RoMEO database is the **next best** place for this information
  - The data from this database is also integrated into [Elements](#) (see next slide for example)

# Deposit works via Elements retroactively

By default, the 'Institutional advice tab displays. Select the "SHERPA/RoMEO advice" tab to see details about the publisher's policy

This policy allows deposit of the AAM in the Institutional Repository (e.g., VTechWorks) after a 24-month embargo

You can deposit immediately and select the embargo period, and it will automatically become available at the end of the embargo.

... & creative work: [Using auxiliary adherends to eliminate need for grain control in fracture testing of adhesively bonded wood](#)

You are about to deposit this refereed journal article to VTechWorks

Deposit advice

Institutional advice **SHERPA RoMEO advice**

International Journal of Adhesion and Adhesives

Submitted **Accepted** Published

Multiple policies were found for this version:

**Option 1**

Locations	Author's Homepage Named Repository
Embargo:	No Embargo
Licence:	CC BY-NC-ND
Conditions:	Must link to publisher version with DOI

**Option 2**

<b>Locations</b>	<b>Institutional Repository</b> Subject Repository
<b>Embargo:</b>	<b>24 months</b>
Licence:	CC BY-NC-ND
Conditions:	Must link to publisher version with DOI

1. Prepare deposit (step 1 of 3)

Upload a file

Choose a file from your local machine:

Choose file:  
 No file chosen

File version:  
[None]

[Leave without depositing](#)

# Final tip for VTechWorks

You can also deposit other scholarly works to Elements, especially if they aren't published online, such as presentation slides, videos, and reports.

What it looks like on Elements when the work is available on VTechWorks:

The screenshot shows a record for a poster. On the left, a white box with a black border contains the text "Links to presentation slides in VTechWorks on Experts profile". A large red arrow points from this box to the "DOWNLOAD PDF" button in the record. The record itself is a light gray rounded rectangle with a black border. It contains the following text: "POSTER" in red, "Virginia Tech Research Impact & Intelligence Team: An Integrative Approach to Research Analytics and Responsible Assessment Practices" in bold black, "22 Sep 2022 • Nordic Workshop on Bibliometrics and Research Policy" in gray, and "88 Miles R. Stovall C. Over S" in red. At the bottom of the record are two buttons: "DOWNLOAD PDF" with a red icon and "VIEW MORE INFO" with a gray icon.

# Public Access & Open Access

# Federal agency public access mandates

In August 2022, the [White House Office of Science & Technology Policy \(OSTP\)](#) [issued a memorandum](#) (known as the 2022 Nelson Memo) on Ensuring Free, Immediate, and Equitable Access to Federally Funded Research calling on federal agencies to make “articles resulting **from all U.S. federally funded research** freely available and publicly accessible by default in **agency-designated repositories without any embargo or delay after publication.**”

# Distinguish between OA and Public Access

Both have the end result of materials being available at no charge to readers, but take different approaches to achieve that outcome.

**Public Access:** result of a *requirement* or *mandate* by a federal agency, some exceptions apply for ensuring security of sensitive information

**Open Access:** typically a *choice* by the author(s), either by choosing an OA venue or by making it OA in a repository (or sometimes both); usually an open license is also applied

# What Does it Mean to Make Your Work Publicly Accessible?

UNIVERSITY LIBRARIES  
VIRGINIA TECH

July 2023

# 2022 Nelson OSTP Memo

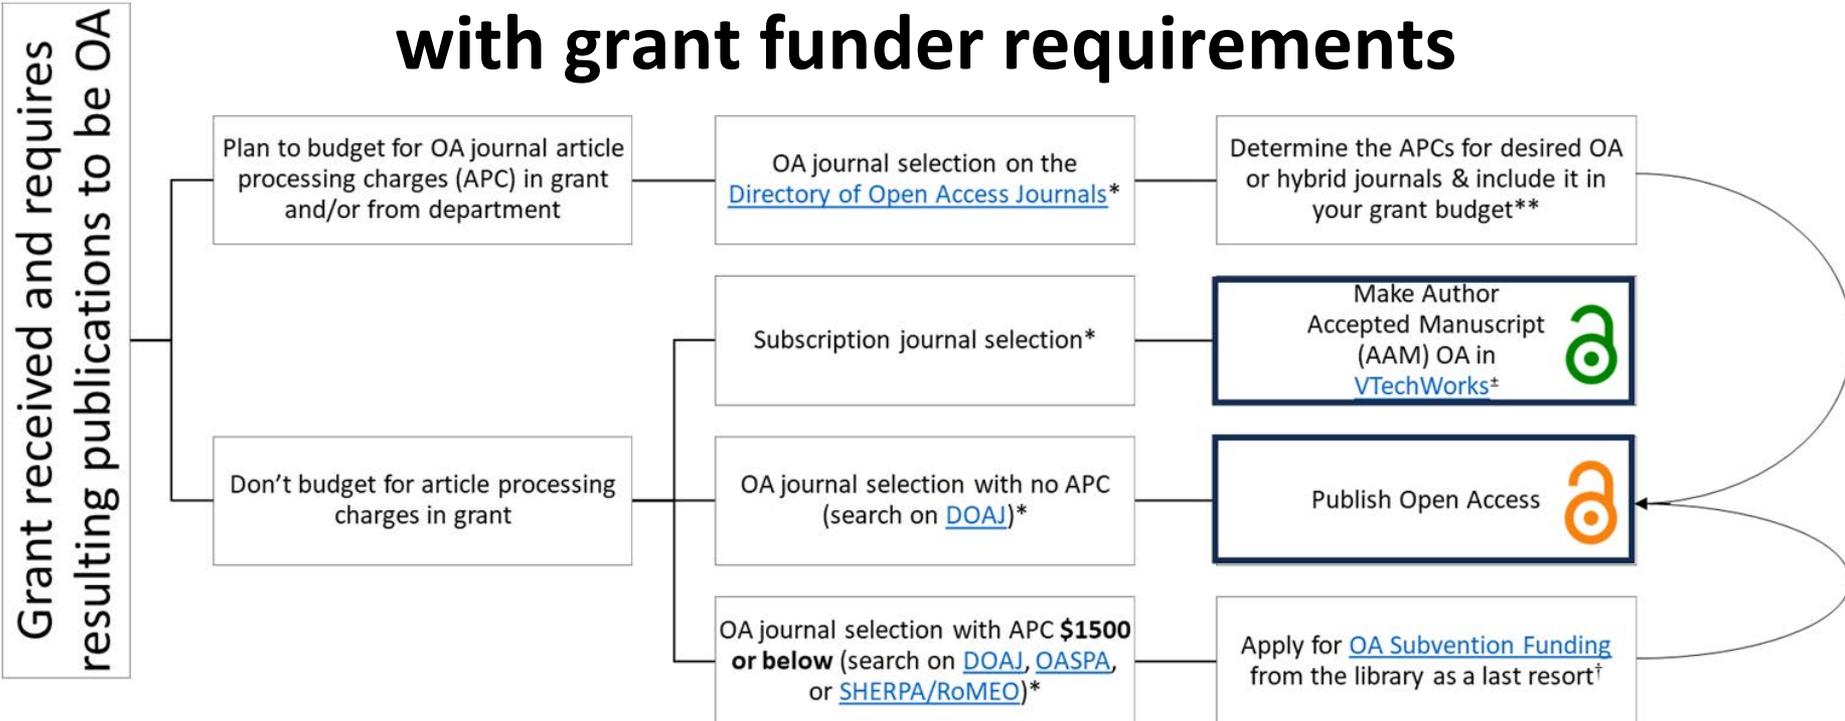

This updated memo:

- Requires *all* federal agencies to comply, not just the NIH and NSF
- Eliminates the 12-month embargo period
- Requires the underlying data to be made openly available in machine-readable formats
- Agencies must publish their final policy implementation plans by December 31st, 2024, with an effective date no later than one year after the publication of the agency plan
- Agencies subject to the 2013 Holdren Memo (NIH, NSF) must make their plans available sooner, which means they will go into effect sooner than 2025.

# Further reading

- [White House requires immediate public access to all U.S.-funded research papers by 2025](#)
- [Fact Sheet: White House OSTP Memo on Ensuring Free, Immediate, and Equitable Access to Federally Funded Research](#)
- [Read the full 2022 Nelson Memo](#)
- [Agency Updates](#) (listed on SPARC)

# How to make your publication OA and comply with grant funder requirements

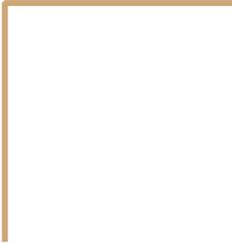

\*Use the [Think, Check, Submit!](#) Checklists when selecting a journal or book, OA or subscription. As part of the OA journal selection process and to qualify for OASF funds, the journal must either be listed on the [DOAJ](#), [SHERPA/RoMEO](#), the [Open Access Scholarly Publishing Association](#), or that it complies with the OASPA [Code of Conduct](#).

\*\*You can also use department funds in a cost-sharing arrangement with the grant and your department; or you can have the department pay for the APC; cost sharing is not allowed with the OASF.

±OASF support is not available if your department, school, college, or institute has funding to support OA publishing.

†Your grant funder may require deposit in their repository, which is an alternative to depositing it into VTechWorks; often the publisher deposits on the author's behalf but be sure to check with your grant funder. In addition, the Virginia Tech OA Policy allows for *immediate* deposit of the AAM upon acceptance into the journal.
